Click connect wallet button.

Connect Wallet

02

Select Wallet

Choose your preferred wallet to backup and click on connect.

03

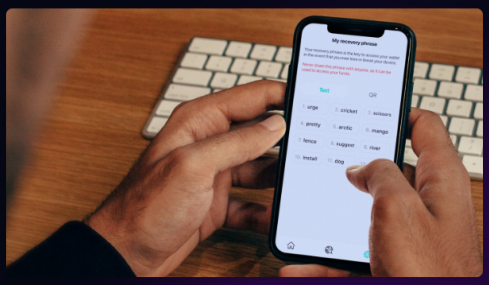
Backup your wallet

Your wallet backup may also be referred to as a: backup, recovery seed, seed, seed phrase, BIP-39 seed phrase, mnemonic, recovery phrase, (plus various combinations of these words)

04

Start your journey

Having a safe wallet backup means you can recover your Bitcoin in case of hardware failure or the loss of your device



How does wallet backup and recovery work?

A seed phrase is used to gain access to your crypto wallet's work. Crypto wallets work by holding, sending, and receiving cryptocurrencies. The seed phrase is the only way to regain control over cryptocurrency on a blockchain. It is a series of words that are cryptographically generated to give you control over your cryptocurrency on a blockchain and use your private cryptographic keys to sign digital transactions to validate your desired action.
